Skills

Front-end: HTML5, CSS3, jQuery, Bootstrap4

Languages: Python, JavaScript, Git

Back-end: NodeJS, MongoDB, Express, API

Projects

BloggersInc.

Website was built using HTML5, Semantic UI, CSS3, JavaScript, JQuery, Node.JS and Express.JS. Used MongoDB to store the non-relational databases of users, blogs and comments. Used PassportJS library to create an authenticated login form. Semantic UI, CSS framework, was used to style the pages. JQuery was used to make the website responsive on phones.

Connected, Automated Vehicle System

This was a small project, I did with two other partners. I had to make a python program that will detect cars. I used grayscale image converter library and numpy package to form red rectangles on cars detected by sensors. CV2 library was installed in program to see the desired results.
